The company "Agroprodukt" is one of the key producers of meat products in Ukraine.

Our business is concentrated on the production of chilled and frozen beef and pork. In addition, the company supplies its products to the largest enterprises of Ukraine engaged in the production of finished meat products. Our products are successfully exported to the countries of the former Soviet Union and the geography of our deliveries are gradually expanding to the European Union, Africa and Asia.

## SCOPE OF BUSINESS ACTIVITY:

Slaughter of cattle and pork, cutting and sorting of meat and offals, storage and sale of meat products. We have 10 years experience of export operations to supply along with their own production of Ukrainian producers of meat raw materials abroad. The company "Agroprodukt" is one of the founders of the Association of production and processing enterprises of the meat industry of Ukraine "Myaso Ukrainy"

## HISTORY OF THE COMPANY

The history of our company in the meat business started since 1998. During these years, we established mature tradition, accumulated experience and developed high-quality team.

In 2001 the company launched its own production of slaughter and processing of beef and pork products of Ukrainian origin.

The company has advanced equipment, high-performance line of cattle slaughter, cold storage for 200 tons of frozen meat.

## OUR MISSION:

Providing users with beef and pork meat and by-products of the high quality that you can be sure.

Decent satisfaction of needs and demands of each of our clients is one of the main goals of our company.

## ACTIVITY POLICY:

Company «Agroprodukt» guarantees its clients:

- Wide range of high quality products;
- Speed & Quality service;
- Regularity and accuracy of deliveries;
- Individual client approach;
- The regularity and accuracy of deliveries.

The main task for the company "Agroprodukt" is to ensure the quality and safety of the products.

In this regard, the company is currently in the process of reconstruction of the industrial and office premises in accordance with the requirements of occupational health and hygiene of the staff, as well as the HACCP requirements, ISO 9001: 2008 and HALAL.

Due to experience, professionalism and competence of our staff, we have established ourselves as a serious and reliable company of international level in the field of export-import operations.

## BRIEFLY ABOUT

Barakat Trading LLC is an international trading company that specializing in exporting Ukraine origin food products and agricultural commodities from Ukraine, Russia, Kazakhstan and etc.

We export products, arrange transportation and sea freight, and deliver the products to our customers in the most efficient manner with respect to price, timing and service.

## MISSION

Our mission is to provide high quality food products to our customers at a reasonable price in a timely manner, thereby benefiting our customers.

## VISION

Our aim is to become one of the leading food and agriculture companies by providing high quality food products and service to our customers at affordable prices.

## PRODUCTS

Ukraine's abundance of high quality poultry, vegetable and edible oils, fruit juices, mineral water, canned vegetable, biscuits, wafers, chocolates, ice cream, breakfast foods, dairy products and other food and agricultural products form the basis of Barakat Trading Company's products offerings.

The Company has developed a trusted and reliable network of producers, farmers and suppliers that meet and exceed both local and international food production standards.

Our main export market focus is to the Middle East and Africa countries. We continue to develop markets and opportunities across the globe to evolve range of food products.

We source our food and agricultural products from Ukraine, Russia, Kazakhstan, Uzbekistan and Kyrgyzstan.

## COMMODITIES

Nowadays Ukraine has become a significant player on the global agricultural and food market. Today the country is one of the leading exporters of grains and oilseeds, sunflower oil, dairy products and etc. Many factors suggest that Ukraine can feed the world and potential production of grain crops in Ukraine is estimated at 80 MMT. Today, the Black Sea region's fertile farms continue to produce grains at world-class levels, with the share of the global wheat trade supplied by the region surpassing 20 percent. Grain industry is a key sector for development of Ukrainian agro-industrial complex, increasing export capacity and meeting demand of grain importers on a stable and long-term basis.

GRAINS	OILSEEDS	PULSES/CEREALS	FEED PRODUCTS	OTHER
› Wheat	› Soybean	› Yellow Peas	› Sunflower meal	› Wheat flour
› Barley	› Rapeseed	› Chickpeas	› Soybean meal	› Corn flour
› Corn (maize)	› Sunflower seeds	› Millet	› Wheat bran	› Corn grits
	› Flaxseeds	› Oats		› Semolina
		› Buckwheat		
		› Mung beans		

## VEGETABLE AND EDIBLE OILS

Vegetable oils are one of the most important foods. Vegetable oil production in Ukraine is a strong agricultural sector. The volume of export of sunflower oil from Ukraine in 2013/2014 marketing year totaled 4 million metric tons. Main importers of Ukrainian sunflower oil are India, China, European and Middle East countries.

Ukrainian market of industrial fats, including margarines and fats for special purposes (confectionery, baking, cooking, substitutes of milk fat) — today is one of the fastest growing segments in food industry with considerable potential of development. Potential production of fats industry in Ukraine is about 500 KMT.

- › Sunflower oil

Milk canning plant JSC «Milk Word», has been occupying one of the leading positions in production of condensed milk in Ukraine for nearly 60 years. Its history began in 1951 and now JSC «Milk Word» is one of the greatest milk canning plants of Ukraine. Besides the domestic market, its production is delivered to the neighboring countries and far abroad, particularly, to America, Canada, Israel, Moldova, Turkmenistan, and Uzbekistan.

«We can tell one definite thing about our production: we offer really high-quality condensed milk produced according to the classical technology. Condensed milk is produced from whole milk, while the products which

contain vegetable fats are called «condensed products». So the consumers have a possibility to choose the exact product they need.

Today production of condensed milk is well-organized based on the strict quality control. This control begins not in the shops where milk is processed, boiled or packed. It begins on the fields, where the cows, which provide the raw materials for condensed milk, are grazed. This practice is justified, because high-quality condensed milk can be made only of high-quality unpasteurized milk. That is why our plant cooperates only with those dairy farms whose milk absolutely corresponds to all the necessary characteristics for production of condensed milk of the highest quality — GOST.

Technologies are improving right in front of your very eyes and the consumers, being aware of that, demand higher and higher quality requirements for production, however, without lowering the requirements for price policy. Therefore, to gain success at the market, the modern producers need to give more and more attention to quality control of the production. Healthy competition is gradually becoming, though not as quickly as it would be desirable, the main promotion stimulator. That means that perfect quality of any product simply becomes obligatory for stable position at the market.

Nezhin canning factory is a well-known producer of canned vegetables in Ukraine. Enterprise offers a full production cycle, from growing vegetables to packing of finished products. The factory was founded in 1927. Original ancient recipes using natural spices are still the basis for production. The abiding traditional products form the basis for development of new products, taking into account the preferences of modern consumers. Only fresh Ukrainian vegetables, spices and natural preservatives as salt, acetic and lemon acid are used in the process of preparation for canning.

More than 1000 hectares of agricultural fields are under cultivation in the Nizhinsky Region, Chernihivska Oblast (Pereyaslovka Village). About 1,000 people are employed. The factory equipped with modern equipment from Hungary, Netherlands and Germany.

This year we bought fields with valid organic certificates for buckwheat cultivation, burrstone mill for obtaining different types of flour, mill for sunflower oil manufacturing and apiary for honey harvest for a new line of premium groceries Seweia™ from Nezhin cannery.

We invite to cooperation importers, distributors and companies that are also interested in the production of products under their own brand names.

Group of companies "UkrAgroCom" & "Hermes-Trading"—is a powerful integration of agricultural corporation with activities based on the application of new production and storage technologies.

Due to a balanced and confident management and a responsible attitude to the production process, proved by high rates in quality, yields and productivity, the company UkrAgroCom has placed itself in **TOP-22 most powerful agricultural holdings in Ukraine**, and the company "Hermes-Trading"—in **TOP-20 largest domestic grain traders** working closely with agricultural producers in most regions of Ukraine. **The companies of the group are members of such international and national organizations** GAFTA, ACC, USUBC, ICC, Ukrainian grain association and other.

## TRADING OPERATIONS

The company "Hermes-Trading" is a powerful operator of the domestic grain market and reliable partner of the farmers in most regions of Ukraine; **During 2014–2015 marketing year export volume** accounted to 500 thousand tons of grains and oilseeds.

A wide network of regional offices of the company "Hermes Trading", own powerful elevator infrastructure help the Group of Companies "UkrAgroCom" and "Hermes-Trading" manage smoothly grains procurement, bring grain to the condition, quality of which meets the requirements in all respects. **The company "Hermes-Trading" buys and exports a full range of grains and oilseeds: wheat, barley, maize, sunflower, rapeseed, soybeans, peas.**

## CROP PRODUCTION

Enterprises of the group of companies "UkrAgroCom" process **75 000 ha** of arable land in Oleksandriyskiy, Petrivskiy, Znamianskiy, Svitlovodskiy and Novoukrainskiy districts of Kirovohradska region as well as Piatyhatskiy district of Dnipropetrovska region. The group specializes in growing wheat, barley, maize, sunflower, canola, peas, sugar beets and other cultures.

The company's strategy is aimed at efficient use of arable land considering climatic specialties of the area and crops, with special emphasis on the quality of cultivation and soil enrichment.

From year to year the use of highly productive equipment by John Deere, Case, Claas, Ropa and other, in conjunction with advanced farming technologies, allow to get high yields far exceeding average indicators in the country.

## ELEVATORS STORAGE

The group of companies "UkrAgroCom" and "Hermes-Trading" owns and operates the following elevators: Svitlovodsk River Terminal, Sharvskiy elevator, "HPP Dobronadiivske", "Korolivske HPP" and the elevator "UkrAgroCom",

the total storage capacity of which accounts for **353 thousand tons of grain.**

Using the most modern equipment of known foreign and domestic manufacturers and technologies of improvement and storage of grain gives businesses the ability to accept agricultural products of different quality and humidity and bring it to the conditions that satisfy export, which guarantees the export of grains and oilseeds up to world standards.

## LIVESTOCK FARMING AND SUGAR PROCESSING

Livestock farming sector of the Group includes the production of pork, beef and milk.

In 2012–2013 the company realized the first in Ukraine dairy complex with innovative project solutions—"Petrykivske Moloko". The project has become unique not only with its innovative technologies (which were previously used only in several business segments) but in that there is going to be the biggest amount of holstein cattle at one production site in Ukraine—5 000 heads, 2 400 of which will be dairy cows.

There are **11 500 pigs** in the farms, among which—931 sows. There were 17 333 piglets born in 2012.

Oleksandriyskiy Sugar Plant LLC is one of the five best plants in Ukraine, specializing in production of sugar from sugar beets. The plant has never stopped its work since 1961, when it was commissioned with a design processing capacity of 2 500 tons of beets per day.

"Ukr-Agro-Product" LLC belongs to the agricultural holding engaged in different directions of activity, namely producing and exporting wheat flour, different types of cereals flakes, semolina, and wheat bran. Our business structure has been existing in the market since 2000 and during that time, it is one of the biggest producer and seller of wheat flour both in the Ukrainian market and all over the World.

The quality of our products, supply reliability and professionalism has earned us a perfect reputation and a trust of our partners.

Our company sales market includes Palestine, Israel, Georgia, UAE, China, North Korea, South African Republic, Lebanon, Angola, Peru, Oman, EU, Turkey and others.

«Ukr-Agro-Product» complex includes the largest elevators and grain processing mills of Ukraine, such as DPZKU "Novoukrainskiy bread-making complex", PJSC «Pererobnik», SC "DP Agroservice 2000" (CJSC «Zaporizhia-Mlyn»).

**SC "DP Agroservice 2000" (CJSC «Zaporizhia-Mlyn», FSSC 22000 certification)**  
SC "DP Agroservice 2000" was created in 2000. Optimal geographic location of the enterprise, the relative proximity to port elevators (in Berdyansk, Kherson), developed network of road and rail connections, as well as the favorable price offers for elevator services allow importers and exporters of grains and oilseeds to use the company as an accumulating tank. The mill elevator capacity of the mill is 36 thousand tons.

### PJSC "Pererobnik"

PJSC "Pererobnik" is one of the largest enterprises of Dnepropetrovsk region on agricultural products processing! The company facilities include a mill complex, an elevator and a feed mill. Elevator capacity is 47.5 thousand tons. For the present moment, the mill complex has the following characteristics: milling capacity — 240 tons of wheat flour per day, packing capacity (in 25/50 kg bags) — 210 tons of wheat flour per day, loading capacity (to 20ft containers) — 192 tons per day. There are two warehouses to store flour packed in 50 kg bags. Storage capacity is 2500 tons and 1950 tons respectively.

### Novoukrainskiy bread making complex (ISO 9001:2008 certification)

Novoukrainskiy bread making complex — one of the leading grain-processing industry Ukraine has deep historical roots. It was founded in 1894. The company facilities include a groats plant, an elevator and a feed mill. In 1999, the groats plant was re-equipped into a workshop for producing ready-made dry breakfast using German company "HANNE" technologies. In 2000 — the commercial production of buckwheat was commenced. So now the groats range is more than 20 types. Cereal flakes — such as oat, rye, wheat, barley, buckwheat, cereals mixture of Extra grade, various types of muesli. The working grain capacity of Novoukrainskiy bread making complex is 139.6 thousand tons, including elevator capacity — 76.1 thousand tons, warehouse capacity — 63.5 thousand tons. Processing capacity of groats plants is 30.5 thousand tons per a year, 190 tons per a day; processing capacity of the feed mill — 96 thousand tons per a year, 315 tons per a day. Each year, among the most famous domestic brands cereals, Novoukrainskiy bread making complex protect the honor of Ukraine at prestigious international exhibitions, such as World Food 2014, World Food 2015.

Ukrproduct Group is one of the leading producers and distributors of high quality dairy products and kvass in Ukraine and abroad with an over 17-year experience. Being the first public company in Ukraine with listing on London Stock Exchange, we can offer you more than our products.

The backbone of our business comprises four dairy manufacturing plants with a total annual integrated capacity of approximately 70,000 tons of dairy products, and one kvass manufacturing plant. All these enterprises are certified according to ISO 9001, ISO 22000 and FSSC standards. Each stage of the Group production process is closely monitored that guarantees a high level of product quality — from raw materials to final goods. Additionally Ukrproduct

Group production facilities have been Halal certified. Both the production process and the final products are free from use of forbidden and potentially harmful additives which has been proved by the audit of the company "Zandak-Halal Ukraine".

## GOODS MANUFACTURED BY UKRPRODUCT ARE DIVIDED INTO TWO MAJOR PRODUCT GROUPS:

**CONSUMER PRODUCTS:** These include packaged butter, blended butter, processed cheese and product, hard cheese and kvass. The products within this range are supplied to wholesalers and retail customers throughout Ukraine and abroad. Both branded products

and dairy products under Private Label of retail chains are produced at Ukrproduct plants. The product range is wide reflecting different consumer tastes. It includes brands of all segments: premium, middle and mass market.

The company is a market leader in processed cheese and one of the top-5 companies producing butter and spreads, as well as one of the top-3 producers of kvass.

**Industrial dairy products:** These include skimmed & full-cream milk powder, whey powder, cheeses and bulk butter and spread.

The Group is a certified supplier to international companies — such as Nestle, Mondelez, Danone, Wimm-Bill-Dann and others.

3. *The instant effervescent series for bathing (Geysers™)*
4. *Liquid soaps, shower gels, body scrubs (Vital Charm™)*
5. *Intimate gel (Vital Charm™)*
6. *Glycerin handmade soap (Flossy™)*
7. *Wet wipes (Vital Charm™)*
8. *Baby's wipes (Dochki & Synochki™)*
9. *Antibacterial gels (Vital Charm™)*
10. *Nail polish remover (Vital Charm™)*
11. *Sea salt food (Salt Way™)*
12. *Dishwashing liquid*
13. *Liquid laundry detergent*

LLC "Aqua Cosmetics Group" ensures delivery in time and product conformity to customer requirements. If you want to release a new product, but do not know how—please contact us.

## WE ARE READY TO PRODUCE FOR YOU THE FOLLOWING PRODUCTS:

- › *Liquid soap*
- › *Shower Gel*
- › *Foam salt for bath*
- › *Bath salts*
- › *Glycerin soap*
- › *Wet wipes*
- › *Cream-soap*
- › *Bath bombs*
- › *Herbal gels*

## WE PERFORM A COMPLETE CYCLE OF PRODUCTION:

1. *Formulation*
2. *The certificates and hygienic conclusions*
3. *Production*

We are ready to perform for you to order any difficulty picking up for this high-quality raw materials. Our technology experts have developed products as satisfying the desire of the consumer and allows the customer to get the estimated rate of profit from the sale of this product.

## WE OFFER YOU:

- › *Famous Brands*
- › *High-quality, popular products at competitive prices*
- › *Regular updating of assortment*
- › *The system of discounts and bonuses for company-distributor*
- › *Marketing support in promoting our products (stocks, booklets, presenters)*

Production facilities are located in the Kiev region. The factory is equipped with modern high-tech equipment and the gradual control of the entire production cycle.

MORE DETAILED INFORMATION ABOUT OUR PRODUCTS PLEASE VISIT OUR WEBSITE [WWW.AQUACOSMETICS.COM.UA](http://WWW.AQUACOSMETICS.COM.UA)

We are confident that our face is a reliable and competent partner for your business, are also willing to consider your counter-offer.

# PJSC SIC BORSHCHAHIVSKIY CPP

Private Joint-Stock Company  
on the Production of Insulin  
**INDAR**

**CONTACT DETAILS:**

5 Zroshuvalna Str.,  
Kyiv, 02099, Ukraine

tel: ..... +380 44 566-36-01

e-mail: ..... info@indar.com.ua

web: ..... www.indar.com.ua

**ABOUT "INDAR"**

PrJSC "INDAR"—leading producer of genetically engineered insulins in Ukraine. Products are manufactured in accordance with GMP. Modern technological site infrastructure, efficient manufacturing processes allow achieving the maximum purity of insulin substance and highest product quality.

**MISSION**

Being a partner of global healthcare system "INDAR" strives to ensure long life of proper quality for millions of people who suffer from chronic and socially significant diseases.

**4 KEY FACTS ABOUT "INDAR"**

**LOCATION:** Kyiv, Ukraine

**FOUNDATION:** June 21, 1999

**EXPERIENCE:** R&D and medication manufacturing, including full technological cycle of genetically engineered insulin production from API to finished dosage forms.

**COOPERATION:** Quality of the products is trusted by the patients and partners from Ukraine, Moldova, Kazakhstan, Russian Federation, Federative Republic of Brazil, Syrian Arab Republic, Yemen Republic, Tajikistan, Georgia and other countries.

**PRODUCT LINE**

*Recombinant human short-acting insulin:*

**HUMODAR® R100R**

- › Solution for injection in 3 ml cartridges № 5 (100 IU/ml)
- › Solution for injection in 10 ml vials № 1, in 5 ml vials № 1 (100 IU/ml)

*Intermediate acting insulin:*

**HUMODAR® B100R**

- › Suspension for injection in 3 ml cartridges № 5 (100 IU/ml)
- › Suspension for injection in 10 ml vials № 1, in 5 ml vials № 1 (100 IU/ml)

*Combination insulin:*

**HUMODAR® C25 100R**

- › Suspension for injection in 3 ml cartridges № 5 (100 IU/ml)
- › Suspension for injection in 10 ml vials № 1, in 5 ml vials № 1 (100 IU/ml)

*Antidotes:*

**PROTAMINE SULFATE**

- › Solution for injection in 10 ml vials № 1, in 5 ml vials № 5 (1000 IU/ml)

*Metabolism products:*

**THIOCTODAR**

- › Solution for injection thioctic (α-lipoic) acid 300 mg in 10 ml vials № 5, № 10

*Antithrombotic products:*

**HEPARIN-INDAR**

- › Solution for injection in 5 ml vials № 1, № 5 (5000 IU/ml)

*Insulin administration devices:*

**PEN INJECTOR FOR INSULIN id Pen**

- › Reusable pen for insulin cartridges id Pen specially developed for insulin cartridges produced by Indar.
- › id Pen can administer insulin doses from 1 to 60 IU in increments of one IU each.

# LEADING UKRAINIAN PHARMACEUTICAL MANUFACTURER **LEKHIM JSC**

## CONTACT DETAILS:

Group of pharmaceutical companies LEKHIM was founded in 1992 and consists of two manufacturing sites, managing head office in Kiev and retail chain around the country.

Two manufacturing sites JSC Technolog and JSC Lekhim-Kharkov are GMP Certified by Ukrainian State Drug Authorities.

LEKHIM offers a broad portfolio of approximately high-quality 150 finished formulations, which ranges from standard generics to complex value-added products. We feel it is important to provide our customers with a diverse product range and breadth in selection, allowing for a true "one stop shop" experience. Our generic products range in complexity from oral solids (pellets, capsules, granules, coated & non-coated tablets), suppositories, oral solutions to complex injectables. We are also a leading Ukrainian provider and producer of essential anti-infective medicines, predominantly antibiotics, while other key product groups include cardiovascular medicines, treatments for central nervous system disorders, gastrointestinal medicines, formulations for treatment of tuberculosis and AIDS, antihistamines, analgesics, antiviral, antifungal, anti-inflammatory, antipsychotic, gynaecological, urological and respiratory therapies, as well as wide spectrum of vitamins.

LEKHIM has been partnering healthcare globally in over 110 countries and in markets as diverse as Africa, Middle East, Asia, Europe and America.

With a history of more than 20 years, LEKHIM is a trusted leader with a reputation for exceptional quality. Our strategic and customer-focused approach to developing,

producing, contract manufacturing and marketing high-quality affordable medicines has successfully made us one of the most respected generics companies in Ukraine and outside the country. It is through this commitment that we constantly strive to innovate, improve and increase the availability of cost-efficient generic medicines to the global market.

# BROVARY ALUMINIUM PLANT

## CONTACT DETAILS:

07400, Ukraine, Kyiv region,  
Brovary, blvd. Independence 30

tel: ..... +380 44 579-90-18  
tel: ..... +380 44 579-90-52  
tel: ..... +380 44 579-90-45  
e-mail: ..... sales@braz.industries  
web: ..... www.braz-industries.com

Brovary Aluminium Plant (BRAZ) was founded in Ukraine in the early 70s as the first strategically important enterprise focused on production of anodized aluminium profile.

After successful modernization of the manufacture the range of products, continuously, increased and now we have more than 8500 items of aluminium profiles of various directions and configurations with a cross section of 0.5 cm<sup>2</sup> and 32 cm<sup>2</sup>, with a minimum wall thickness of 0.7 mm.

**BRAZ** — ecological and non-waste production enterprise with the following manufacturing cycles: casting, extrusion, die manufacturing and selection, coating, anodizing, abrasive processing and the profile mechanical processing workshop.

Products meet Ukrainian and European norms and standards of production (quality is certified with Ukrainian GOST and certificate DSTU ISO 9001:2009 (ISO 9001:2008, IDT)).

The aluminium profile is used in construction, engineering, aircraft engineering, railway carriage manufacturing, heat and electrical engineering, space industry, household sector etc.

Currently Brovary Aluminium Plant is an absolute leader in terms of production in Ukraine. Our products are recognized in Ukraine, Europe, America, the CIS countries and middle East countries

Our mission — to provide for our consumers high-quality aluminium products, regardless of the level of complexity, of the product and the customer's location, using many years of experience to solve complex problems and the implementation of existing opportunities, seeking to take a leading position in its industry.

We conduct our business on the basis of an efficient and environmentally friendly production, using innovation and focusing on the world experience.

## Standard configuration profiles:

- › Electrotechnical strip
- › Tube (round, square, rectangular, three edged, eight edged, oval, special)
- › L-profile (equilateral, versatile)
- › Rod (round, square, hexahedral)
- › Other profiles (T-profile, Z-profile, I-profile, U-profile, flanged U-profile)

## And more than 7,000 custom configuration profiles:

- › Profile for electrical equipment
- › Translucent structures
- › Profile for decorative works
- › Construction profile
  - › profile for suspended ceilings
  - › furniture profile
  - › specialized profiles
  - › trade and exhibition systems
- › Profiles for advertising constructions

# ELECTROPRIVOD Ltd

## CONTACT DETAILS:

34 Trolleybusna Street  
69008, Zaporizhzhia, Ukraine

tel: ..... +380 61 224-60-17  
mob: ..... +37 257-220-379  
e-mail: ..... goelprivod1996@gmail.com

Electroprivod Ltd. was founded and operates with the purpose to satisfy humankind needs for industrial development. Just like now, people will always require effective machines mining ores, making steel, cement, electricity plastics, building homes and transport loads. Our team ensures effective operation of these industrial machines and mechanism. We design, produce and modernize electric drive systems for industrial machinery ensuring efficient work of crane drives. Completing expeditions all over the globe, our team has truly become "driving force" of the Fourth Industrial Revolution.

Electroprivod designs, produces and supplies Industrial Drive Systems of IDS, DTS, ETS series, which are required in 7 fields of manufacture.

IDS (Industrial Drive Systems) is a set of electromechanical systems that ensures the fulfillment of technological operations by industrial machines within set-up parameters in specified mode over a complete cycle throughout service life.

IDS can be installed on: overhead, gantry, tower, portal cranes.

DTS (Direct Technical Systems) is a directional technical systems designed for machinery installed on plants in the range of five industries where direct current drives work in very heavy duty class.

ETS (Engineering Technological Systems) is a technological systems aimed to ensure operation of machinery.

In addition, we perform 2 types of modernization and 2 types of major overhauls of cranes and technological units, using Industrial Drive Systems of IDS, DTS series.

With 19 years of work experience, own manufacturing facilities, Research & Development center, Electroprivod Company has all the necessary to perform quickly and efficiently engineering and working projects, and to produce different series of drive systems with their further installation in course of works on drive systems modernizations and repairs.

**Currently, our Company operates in the range of seven industries:**

- › metallurgy;
- › mining and ore-processing industry;
- › heavy-engineering;
- › industrial construction;
- › transport infrastructure;
- › energy;
- › chemical industry.

In 2014, engineers and electromechanical personnel of the Company finished designing complete drives of DTS series, made for technological units working in heavy duty operational mode (A8). DTS series enables accurate depth and rotary speed control, improved mounting characteristics and low energy consumption. On 2015, it is scheduled test and supply of DTS complete drives.

Enterprise LLC "Elektrostal" was founded in 2004 year in town Kurakhovo, Donetsk region, Ukraine. In 2008, after some years of plant building, the first melting was produced. That laid the foundations of successful plant operation.

The advanced equipment of the famous foreign producers is used for production process with application of innovative technologies.

The steel melting is carried out in the electric arc furnace of 50 tones capacity with electric bottom tapping and slag draining and without slag pots using.

Secondary metallurgy is produced at the 50-tones ladle-furnace. This mounting enables to produce the metal with chemical composition in a tight range of values.

The cast steel billets are produced at the S-type continuous casting machine.

The planned capacity of the steelmaking is more than 500 000 mt/year of the continuous casting billet with the following square section range 120x120; 125x125; 130x130; 135x135; 150x150 of different steel grades.

# FIRM RELAYEXPORT LTD

**CONTACT DETAILS:**

4, Ivan Lapse blvd,

tel: ..... +380 44 373-68-71  
fax: ..... +380 44 373-68-77  
e-mail: ..... info@relayexport.com

Firm "Relayexport" Ltd. has supplied electrical and mechanical equipment and spares for it during more, than 25 years.

We provide repairing, modernization and retrofitting of equipment at the customer site, including erection and commissioning, supervision and service of equipment. Our specialists can inspect existing equipment, prepare and fulfill projects for its renovation at least up to original specification level and it saves time and money.

We supply equipment and spares from original equipment manufacturers (OEM) only.

Our major customers are nuclear, thermal, hydro power plants, steel plants, machine-building enterprises (machine works).

We are interested in establishing mutually beneficial cooperation with plants, which were built with the former USSR assistance, and/or their business partners

We are ready to meet the main requirements of steel and power plants from Africa and Middle East region especially like pointed below.

**List of enterprises equipped with the former USSR and CIS countries equipment:**

ALGERIA	Jijel TPS; Annaba-3 TPS
ANGOLA	Capanda HPP
EGYPT	Suez TPS; Helwan Steel Plant; Aswan HPP
MOROCCO	«Jerada» TPS; Mansur Eddahby HPP; Ait-Adele HPP; Muellei lussef HPP; «Al Vahda» HPP
NIGERIA	Ajoakuta TPS
ETHIOPIA	Tis-Abbay HPP; Malka Vakana HPP

**Our experience shows, the greatest demand is for following equipment, spares and services:**

- › Steam turbines and boilers;
- › Pumps and compressors;
- › Substations, power and measurement transformers, electric generators and motors, excitation systems, high-voltage circuit breakers and switchgears (with retrofit possibility, including EC produced), contactors, relays;
- › Cables and wires;
- › Presses, machine tools (including CNC and hydraulic system modernization);
- › Forgings and castings (machined and rough);
- › Metallurgical equipment.

Public joint-stock company  
**KREMENCHUK  
WHEEL PLANT**

PJSC "Kremenchug Wheel Plant" is an enterprise specializing in the manufacturing of steel wheels for the motor vehicles and agricultural machines. Its production has Ukrainian and Russian certifi-

icates of conformity. The quality management system has been implemented according to the requirements of ISO/TS-16949 standard. The production range exceeds 800 units and is

exported worldwide. PJSC "Kremenchug Wheel Plant" is a full member of European Tyre and Rim Technical Organisation (ETRTO) and Association of European Wheel Manufacturers (EUWA).

# Public Joint Stock Company KYIV CENTRAL DESIGN BUREAU OF VALVES

## CONTACT DETAILS:

Ukraine 03113  
Kyiv, Polkovnyka Shutova str. 9

tel/fax: ..... +380 44 490-94-85  
e-mail: ..... office@kckba.kiev.ua  
web: ..... www.kckba.com.ua

PJSC Kyiv Central Design Bureau of Valves is an engineering and production machine building company, developing and manufacturing valves for the nuclear and thermal power stations, oil-and-gas, chemical industry and aerospace complex.

Modern engineering center, high quality production facilities and own testing base enables the Company to operate under the closed-loop cycle from customer technical assignment to "design-manufacturing -testing -delivery to the customer-maintaining and servicing" of the products within the shortest period of time.

## The main areas of the Companies' operation are:

- › development and production of pipeline valves required for nuclear power plants safety systems.
- › development and production of small-sized pneumohydraulic units for different space and aviation machinery.
- › development and production of pipeline valves for oil, gas and chemical industries, main and local water supply systems, ventilation systems.
- › technical control, diagnostics and qualification testing of equipment for nuclear power plants and other critical objects on the basis of diagnostic equipment and special bench testing units.

## To ensure its high quality production PJSC KCDBV has:

- › certified quality management system in accordance to the ISO 9001:2008 standard;
- › highly qualified engineering and manufacturing personnel;
- › modern production capacities;
- › testing center;
- › central control laboratory.

The company was founded in 1954. Since then its products are installed and successfully operated at all the Ukrainian NPPs, and also NPPs of Russian Federation, Belarus, Hungary, Bulgaria, Czech Republic, People's Republic of China, Iran, India, etc. KCDBV has extensive experience in designing pneumatic valves which successfully served in various systems of orbital space stations "Salut" & "MIR", spacecrafts "Soyuz", "Progress", automatic interplanetary stations vehicles "Venera", "Vega", "Fobos", "Astron" and other spacecrafts. Nowadays KCDBV develops and supplies valves and special units for aircrafts types AN (Antonov)-70, AN-140, AN-38, AN-148 and other.

## Aviation Aggregates

 tel/fax: ..... +380 44 528-30-47  
 e-mail: ..... zdradar@adsl.com.ua  
 web: ..... www.radar.net.ua

## ENTERPRISE CAPACITY:

PJSC Kyiv Radar Plant was established in 1930. It is one of the leading enterprises of Ukraine specializing in manufacture of modern radio-electronic and radar equipment for airplanes and helicopters. The main product lines of these activities are:

**Airborne meteo-navigation radar station "BURAN-A"**

In various modification it is installed on AN-140, AN-148, AN-38, AN-74TK-300, IL-114, BE-200 aircrafts.

**Functionality:** to ferret out dangerous thunderstorm activity, ground plane scanning for pin-points detection to perform pilot & nav missions

**"OSMINOG E" target location and pointing system**

**Functionality:** it is installed in naval KA-28 helicopters to target location, tracking, data transfer into the system hit control for surfaced, submerged and radar-visible objects. The system is comprised of radar station to observe surface, to perform navigation missions

**Airborne integrated navigation-landing system "KURS-93M"**

By its technical and operational characteristics fully corresponds to the ICAO requirements. The equipment is installed on AN-140, AN-148, MIG-29 aircrafts, MI-8 helicopters and others. **Functionality:** it provides for aircraft flights navigation with VOR system radiobeacons, prelanding maneuvers and approach landing by ILS and SP-50 radiobeacons; marker radiobeacons flyby signaling. The system is comprised of radio receiving unit RRU and console box CB.

**Inertial semiactive homing head 9B1101K**

Is the list of air-launched missile equipment for air-to-air type R27R1 and used as integrated ordnance packing for MIG-29, SU-27 aircrafts. **Functionality:** target lock-on at the altitude range 0,02–25 km with maximum exceeding (reducing) 10 km subject to target speed up to 3500 km/h and g factor 8; target lock-on range with electronic paramagnetic resonance — 3 sq.m—25 km; time of inertial targeting with radio correction under the maximum distance out of carrier up to 25 km—30s; simultaneous two missiles launch at two targets; missile control in the inertial zone upon self-direction mode; operational readiness in 2 s elapsed since target lock-on by the control system of the carrier type MIG-29, SU-27

**Sighting-navigation system PNS24M**

**Functionality:** it is installed in SU-24M aircraft and under any complexity degree weather conditions supports autoflight as per preset and on-line check-points with pointing data adjustment option; target detection and targeting of all airborne weapons onto the ground communications (both hidden and uncovered) air and water surface targets, safe flyby at the altitudes from 50 m to 600 m both under autoflight and semi- autoflight mode.

Possessing with production capacity and high professional staff and considering present world economic globalization challenges entity rapidly develops trade relations with cross border partners to be embedded into the world-wide production of electronics and other consumer goods upon B2B structure as subcontractor. In particular, for this purpose we have full production cycle of the state-of-the-art printed circuit boards from the foil-clad dielectrics (either two-layer, or multilayer printed circuit boards) of the 3–5 class of difficulty.

*Printed circuit boards manufacturing*

The plant performs any difficulty level repair process of the above equipment. Quality management system of the enterprise is in the compliance with ISO 9001:2008, EN9100:2009. Manufacturing of the "BURAN-A", "KURS-93M" was additionally certified by AR MAC.

# Public Joint Stock Company SUMY MACHINE-BUILDING SCIENCE AND PRODUCTION ASSOCIATION

## CONTACT DETAILS:

58, Gorkoho Str.,  
Sumy, 40004, Ukraine

**Aleksandr MESKHIYA**, Sales Director

e-mail: ..... sales@frunze.com.ua

tel: ..... +380 542 22-63-62

Public Joint Stock Company "Sumy Machine-Building Science and Production Association", established in 1896, is one of the Europe's largest companies, manufacturing various equipment and providing a full range of services for the development, production, installation, commissioning, warranty and after-sales services of process equipment and complete facilities for the following industries:

- › Oil and gas (extraction, processing, transportation);
- › Chemical and petrochemical;
- › Gas turbine-, heat, and hydraulic power generation;
- › Nuclear power generation;
- › Mining & metallurgy

The Company comprises the following 4 product-focused manufacturing sites:

- › turbo compressors & turbo generators
- › pumping equipment manufacturing
- › fixed equipment manufacturing,
- › blank production

Seven subsidiaries (limited liability companies) support basic business of the company. All manufactured equipment is tested at hydraulic, pneumatic, balancing and full load string test benches.

PJSC "Sumy NPO", unique by its production potentialities, has 2000 machine tools and machining centers, hires 4000 highly qualified production and 700 engineering staff. The

company has its own forging and foundry facilities.

PJSC "Sumy NPO" fulfills design and manufacture of turbo-compressor packages, valves for gas trunklines, complete gas compressor stations, pumping equipment including pumps for Nuclear Power Plants, reciprocating compressors and mobile compressor stations, equipment for chemical, petrochemical industry.

We provide integrated solutions using own engineering, manufacturing and installation/commissioning potential providing up to 90% of self-fabricated products within the scope.

PJSC "Sumy NPO" has close partnership ties with customers in more than 40 countries worldwide. Our partners are the Companies in CIS countries, such as Azerbaijan, Belarus, Kazakhstan, Russia, Turkmenistan, Ukraine, Uzbekistan, as well as in the following countries: Bulgaria, Czech Republic, China, Iran, Turkey, etc.

We are ready to supply the following equipment: turbo-compressor trains, centrifugal and reciprocating compressors; industrial pumps including pumps for NPPs; oil and gas equipment; equipment for chemical production; pipeline valves to CIS and Caspian region countries, Eastern Europe, Central Asia, Middle East, Latin America (Brazil, Venezuela), South-East Asia (Indonesia, Malaysia).

# Public Joint Stock Company Integrated Iron & Steel Works **ZAPORIZHSTAL**

## CONTACT DETAILS:

### Contact data of sales structures:

[www.zaporizhstal.com/ru/deyatelnost/klientam/kontakty-sbytovyh-struktur](http://www.zaporizhstal.com/ru/deyatelnost/klientam/kontakty-sbytovyh-struktur)

72, Pivdenne Shosse,  
Zaporizhzhia  
Ukraine, 69008

call center: ... +380 61 218-30-09  
fax: ..... +380 61 213-18-58  
e-mail: ..... [office@zaporizhstal.com](mailto:office@zaporizhstal.com)  
web: ..... [www.zaporizhstal.com](http://www.zaporizhstal.com)

PJSC "Zaporizhstal" occupies one of the leading places in metallurgical industry of Ukraine. "Zaporizhstal" vividly heads on increasing of production efficiency, equipment upgrading as well as on creation and improvement of safe working conditions for employees.

The structure of production includes sinter shop, blast furnace shop, open-hearth furnace shop, cogging mill, hot strip mill rolling shop, cold rolling mill shops № 1, 3. The enterprise has a long-term plan to pass to the BOF steelmaking process.

### The "Zaporizhstal" Steel Works produces the following types of commodity product from carbon and low-alloyed grades of steel:

- › Hot rolled coil—thickness of 1,8–8,0 mm and width from 970 up to 1500 mm.
- › Hot rolled coil with slitting—thickness of 1,8–8,0 mm and width from 30 up to 735 mm.
- › Hot rolled sheet—thickness of 1,8–8,0 mm, width 970–1500 mm, length 2000–6000 mm.
- › Cold rolled coil—0,5–2,0 mm and width 970–1500 mm.
- › Cold rolled sheet—0,5–2,0 mm, width 1000–1500, length 2000–2500 mm.

- › Expanded metal sheet
- › Cold formed section
- › Steel strip
- › Black plate.

High quality of the enterprise product is proved by the demand for it in the internal and external markets. It is in demand in the countries of the European Union, CIS countries, countries of the Near East and Africa, Latin America, Persian Gulf and South-East Asia.

The main consumers of the Works' products are the manufacturers of welded pipes, enterprises of the automobile, transportation and agricultural machinery industry and manufacturers of household appliances.

The integrated system of quality management, power efficiency, protection of labour and ecology, which extends over all industrial site and administrative services of the Steel Works, functions at the PJSC "Zaporizhstal". The integrated system of management corresponds to the international standards ISO 9001:2008, ISO 50001:2011, OHSAS18001:2007», ISO 14001:2004.

In 2015, the Steel Works has produced 3,4 million tons of the rolled products.

### The PJSC "Zaporizhstal" gradually solves strategic problems for realisation of the set targets:

- › Production of the high-quality metal products, which meet the requirements of clients;
- › Upgrading and reconstruction of the basic production assets;
- › Introduction of advanced technology and innovations;
- › Achievement of leading positions in the field of production, management and organisation of business processes;
- › Ensuring of the industrial safety, healthy and safe working conditions;
- › Reducing of technogenic influence on environment.

GFT Ltd produces a universal liquid organic fertilizer that demonstrates the ecological advantages of a new patented technology combined with superior standards of safety.

This organic fertilizer is recommended for all kinds of plants and is highly effective for outdoor and indoor use.

Our fertilizer has the unique structure and qualities, contains the organic compounds only and no chemical additives.

This liquid organic fertilizer is the product of Ukrainian, European and American companies' cooperation. Now it is successfully produced and widely sold in Ukraine and the USA.

Our organic fertilizer improves the quality of the agricultural products. It helps to increase the sugar, the cellulose and the vitamins quantity in crops.

*Beet (Ukraine)*

This fertilizer reduces the plant susceptibility to diseases and pests. The plants resist more effectively to the unfavorable environmental conditions (drought, frosts, etc.). The crop yield growth is registered up to 20–50% depending on the type of plant.

GFT Ltd is constantly looking for the new partners around the world.

We are always ready to discuss the prospective of our cooperation.

This organic fertilizer also helps to prolong the shelf life of the agricultural products.

If you are interested to buy, to sell or to start the production of our liquid organic fertilizer on the territory of your country do not hesitate to contact us.

*Lemon tree Florida (USA)*

*Sunflower (Ukraine)*

**Uniplyt LLC**—an independently owned, fully integrated company with manufacturing facilities in Western Ukraine, offers one of the most comprehensive selections of high-quality wood-based products. We produce Fiberboard, Painted Fiberboard, Plywood and Sawn Timber.

Our key priority is the search for new areas of application for woodworking products, extending assortment, flexibility in inquiry fulfillment and improvement of our products' quality.

Uniplyt is the only company in Ukraine that manufactures fiberboard using a wet type production technique. We use only water in wood fiber transportation and mat formation. Therefore, Uniplyt fiberboard does not contain any synthetic and harmful resins (like urea-formaldehyde or phenol-formaldehyde) and has a class of emission E0.

Our goods meet European and national standards. BS, GOST, UkrCEPRO and is thoroughly certified. In production we use modern European equipment that provides high quality products that are safe for humans in compliance with international environmental and social requirements.

Large amount of projects implemented by Uniplyt are aimed on reducing the negative impact of production on the environment. They include the modernization of technological process, equipment reconstruction and implementation of new technologies. In addition, the final products can be converted to compost and be used as fuel materials.

Uniplyt, LLC was granted a Forest Stewardship Council (FSC™) Chain-of-Custody Certification. FSC chain-of-custody tracks FSC certified timber material through the whole process—from the forest to the consumer, including all stages of processing, transformation, manufacturing and distribution. Which indicates that our products are made of wood, obtained from legal sources

In working with clients we focus not only on the companies involved in the manufacturing segment, but also the end user. We provide comprehensive services for product delivery, logistics support. Warehouses in various regions of Ukraine allow us to quickly make deliveries and minimize shipping costs. The complete independence from any external source of raw materials supply will guarantee unshakable stability of our production.
